

Franck Abecassis

Mobile Network Support Engineer

+33 6 16 83 55 04 · franck.a86@gmail.com · Créteil, France · linkedin.com/in/franck-abecassis

Profile

Support engineer with 11 years of experience handling technical issues for enterprise, consumer and carrier customers. These years let me work across every kind of issue (access, core network, handset, service), requiring close coordination with all support teams involved.

Beyond my technical expertise, I developed strong ease in client relations through regular exchanges across all channels, including in person, from individual customers to very large accounts, while meeting mission-critical deadlines.

Having distinguished myself technically, I also delivered training, supported process changes, documented procedures and led projects.

Professional Experience

SFR

Support Engineer

June 2024 – Present

2 years 1 month

SFR · Paris, France

- End-to-end & roaming support
- Mobile, radio and core network protocol analysis
- End-to-end analysis of complex incidents
- Level 3 support: MVNO, key accounts, B2B
- Inbound/outbound roaming support

SFR

Support Engineer

November 2018 – June 2024

5 years 7 months

SFR Business · Paris, France

Promoted to engineer status following approval by an internal SFR committee, after presenting a proactive customer-care project: real-time correlation of customer reports to generate alerts by zone, category or symptom, complementing existing alerting (equipment alarms, KPI deviations).

- Led support procedures and built complete technical/business documentation
- Trained technicians and support staff
- Analyzed and optimized support for recurring issues
- Led PMR, radio and mobile voicemail categories
- Managed the incident backlog
- Set up tracking of service metrics and performance
- Recurring presentations to other entities highlighting recurring and high-impact issues, and backlog trends over time

SFR

Support Specialist

November 2015 – November 2018

3 years
